The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/561,327	Applicant(s) LILLEHEI, KEVIN O.	
	Examiner Kevin T. Truong	Art Unit 3734	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-17 are objected to because of the following informalities: At least claims 1 and 15 are missing the transitional phrases such as "comprising" or "consisting essentially of" . Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Roth (US 6015433).

Note in figures 1-5 of Roth, a expandable surgical cannula (1) is interpreted as a floating surgical cannula and is made of nitinol alloy and a surgical tool is used for inserting the cannula (1) into human's brain; and wherein the exterior and interior of the cannula can be coated with materials as recited in the claims. With respect to the method claims 15-17, it is note that the Roth device can be used to perform the method as claimed includes forming a small opening at the location in need of surgery, inserting a contracted floating surgical cannula at the location, and expanding the surgical cannula to a size sufficient for surgery.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 3734

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Brenneman (US 6406487).

Note in figures 1-5 of Brenneman, a expandable surgical cannula (1) is interpreted as a floating surgical cannula and is made of nitinol alloy and a surgical tool is used for inserting the cannula (1) into human's brain (3); and wherein the exterior and interior of the cannula can be coated with materials as recited in the claims. With respect to the method claims 15-17, it is note that the device of Brenneman clearly capable of performing the method as claimed includes forming a small opening at the location in need of surgery, inserting a contracted floating surgical cannula at the location, and expanding the surgical cannula to a size sufficient for surgery.
